NOTE ADJUSTABLE PARTS

## No Machine Work

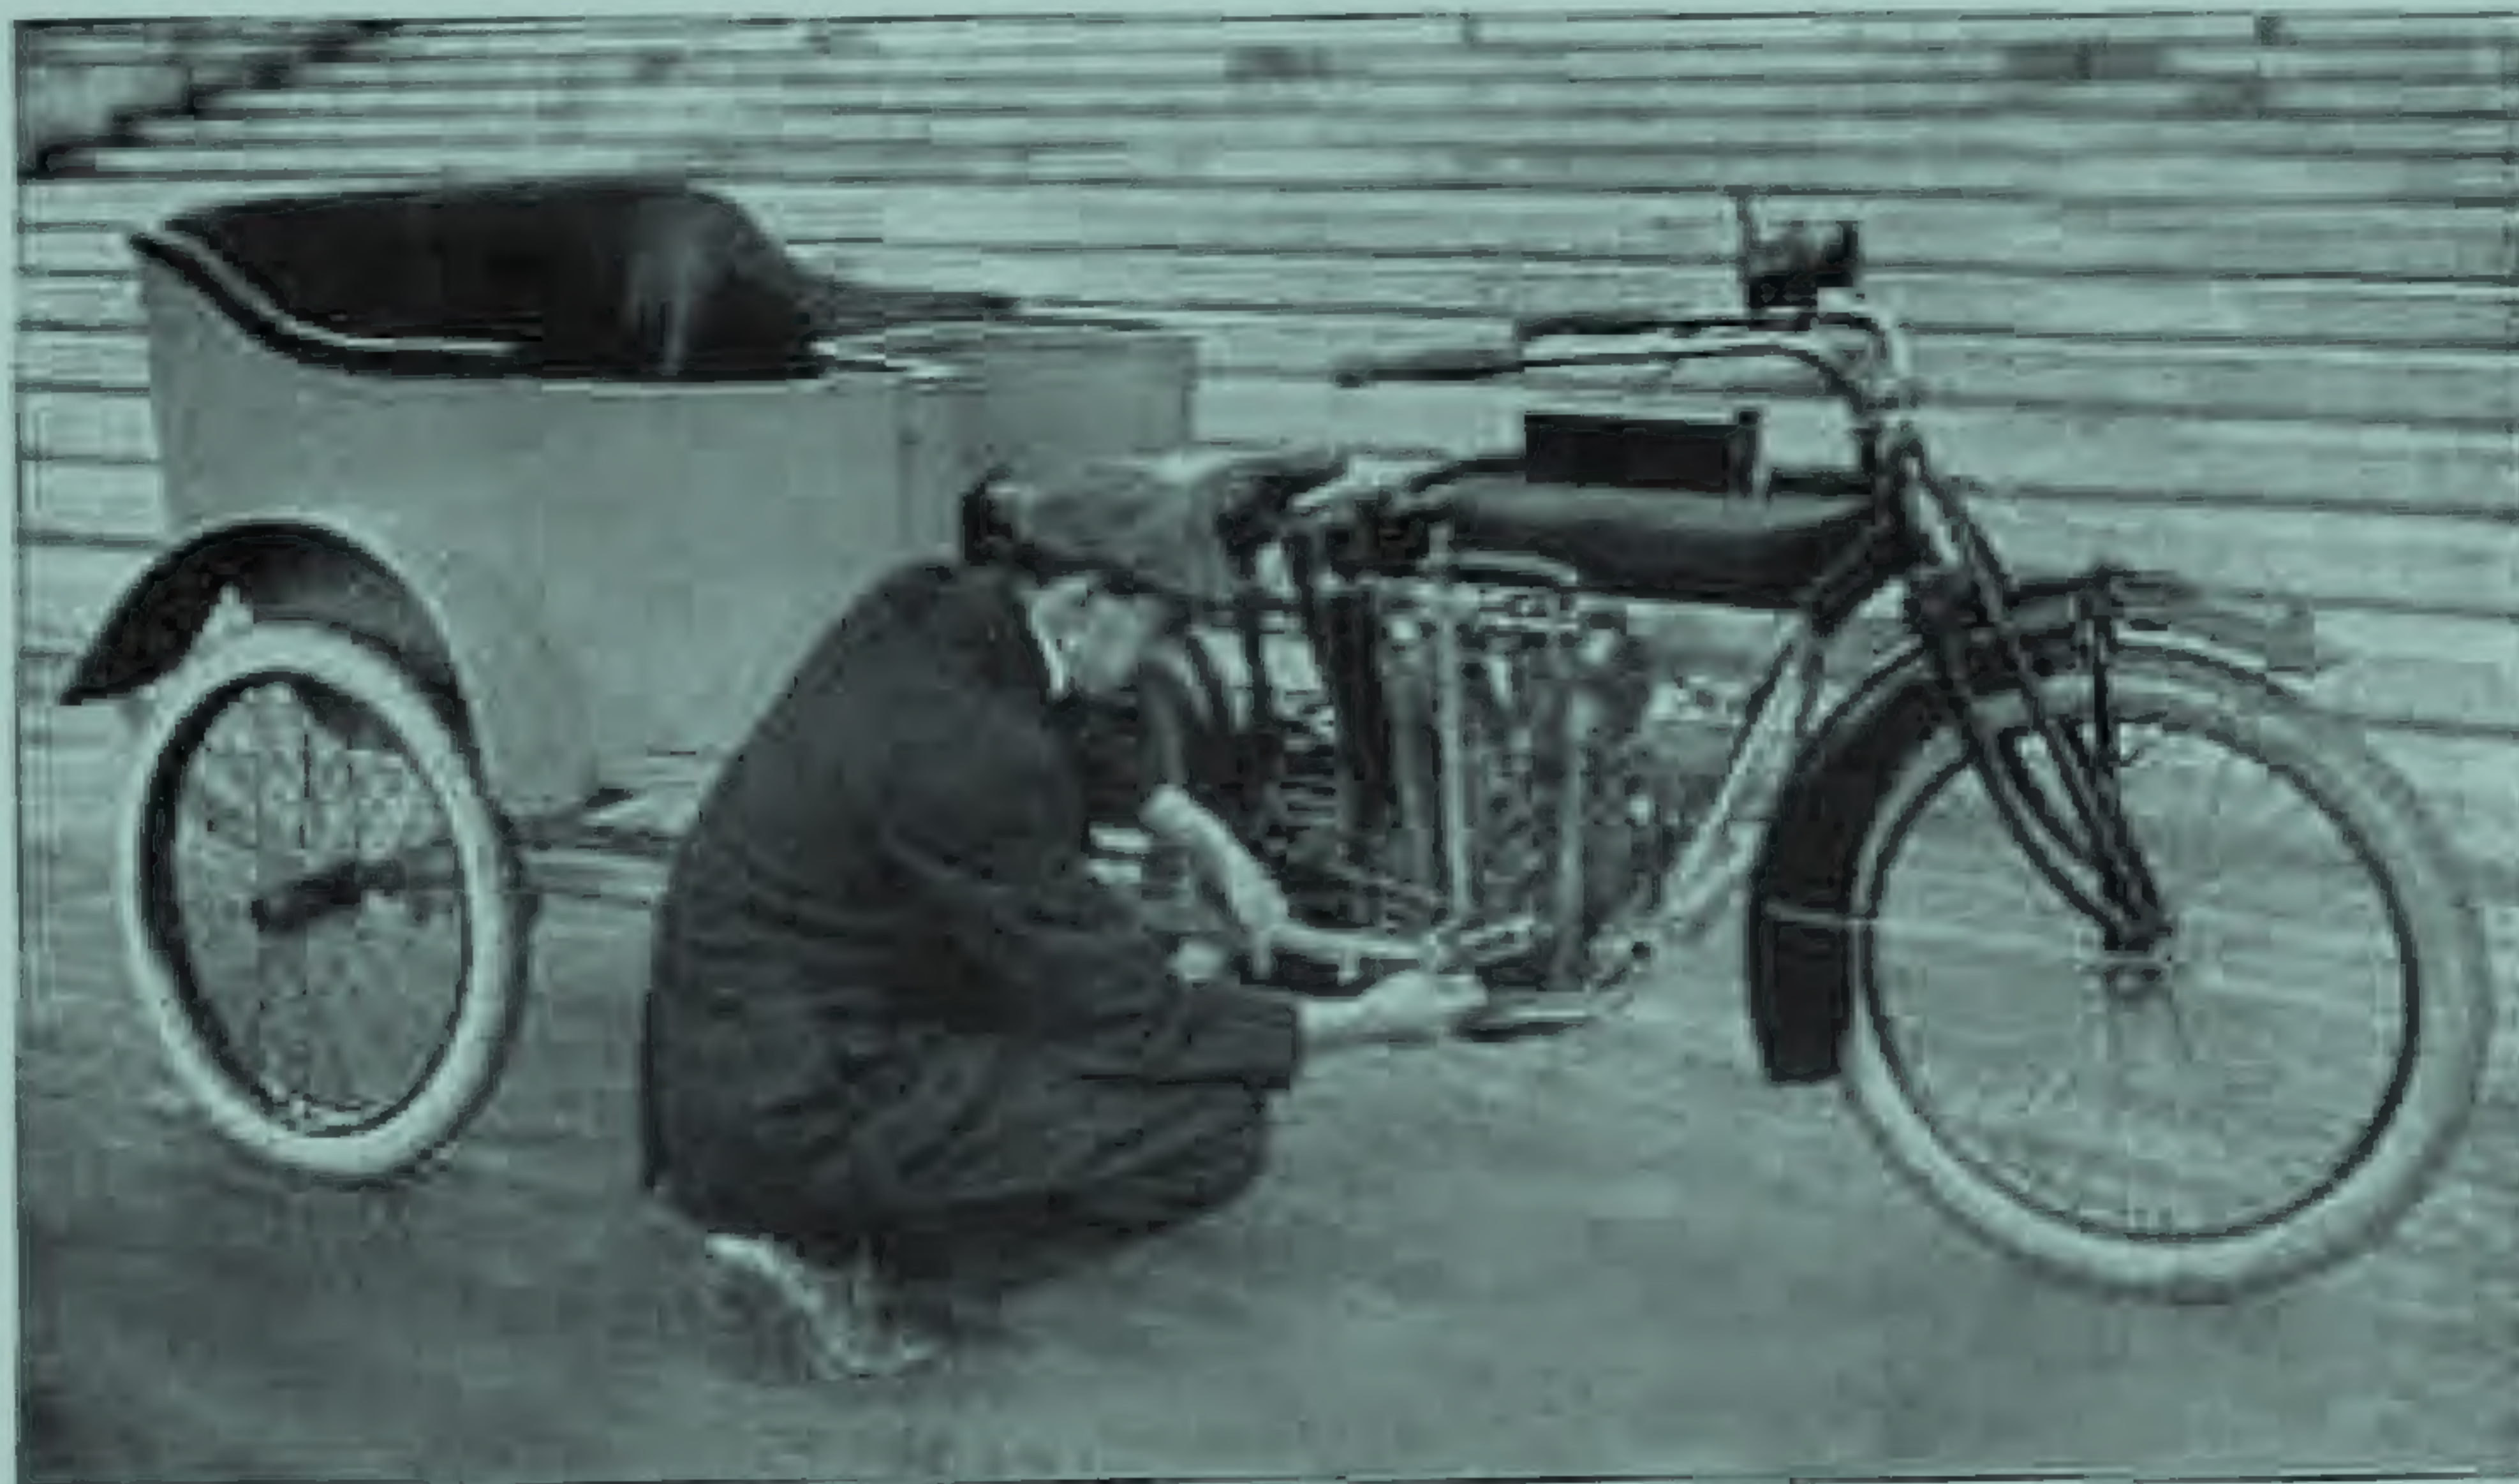

Front brackets are attached and adjusted in 15 minutes. When motorcycle only is to be used, these brackets can be left on the machine. They are quite inconspicuous and make a convenient and comfortable foot rest.

Front brackets are adjustable in 3 places. This makes it possible to fit on any standard make motorcycle.

Attaching and Adjusting Front Brackets

Note Simplicity of Construction

## “On or Off in 30 Seconds”

ATTACHING CYGNET REAR CAR TO FRONT BRACKETS

Draw the shafts of rear-car up behind motorcycle. Ends of shafts fit onto plates of front brackets and are then securely fastened by clamp and thumb screw.
